

SoftStore / GearShop E-Commerce Project Proposal

Itemized Scope of Work, Deliverable Timelines & Cost Estimate

COMMERCIAL DEVELOPMENT PROPOSAL & ITEMIZED QUOTE

Project Name: SoftStore / GearShop - High-Performance E-Commerce Engine

Prepared For: Executive Client Team

Prepared By: Lead Senior Full-Stack Developer

Document Type: Formal Client Proposal & Commercial Scope of Work

1. EXECUTIVE SUMMARY

We propose to design, build, and deploy a custom, high-performance e-commerce platform engineered specifically for professional photography, videography, and lighting equipment sales.

Unlike off-the-shelf platforms (Shopify/WooCommerce) which suffer from slow loading times, monthly plugin subscription fees, and complex checkout friction, this custom solution is built with **React 19, Vite, TypeScript, and Supabase**. It features **1-click WhatsApp Cash-on-Delivery (COD) checkout, automated Google Sheets CRM synchronization, sub-second fuzzy search**, and a **custom build-time SSG pre-renderer** ensuring 100% Google search indexing.

2. ITEMIZED DELIVERABLES & INVESTMENT BREAKDOWN

The scope of work is broken down into 9 concrete engineering modules. Pricing is itemized below based on realistic senior freelance development rates (\$30–\$50 / hour):

Deliverable Module	Scope & Technical Execution	Dev Hours	Standard Rate (\$35/hr)	Premium Rate (\$50/hr)
1. Frontend Core Build	React 19 + Vite + TypeScript setup, Tailwind CSS v4 design system, dark/light theme engine, React Router v7, product grid, Fuse.js fuzzy search, Swiper carousels, and filter drawers.	35–45 hrs	\$1,225 – \$1,575	\$1,750 – \$2,250
2. Database & Fail-Safe Engine	Supabase Cloud PostgreSQL setup, typed schema, client initialization, and 5-second timeout fail-safe logic with hardcoded local fallback data to guarantee 99.99% uptime.	8–12 hrs	\$280 – \$420	\$400 – \$600
3. SSG Pre-Rendering Engine	Custom Node.js build script (prerender.cjs) converting SPA product routes into pre-rendered static HTML with injected titles, meta tags, canonicals, and crawler text blocks.	10–15 hrs	\$350 – \$525	\$500 – \$750
4. Complete SEO & Geo-Targeting Suite	JSON-LD Structured Data (StructuredData.tsx) covering Store, Product, FAQ, Breadcrumbs), dynamic XML sitemap with image metadata, and regional landing pages (/cinema-lenses-maroc , /magasin-casablanca).	15–20 hrs	\$525 – \$700	\$750 – \$1,000
5. Google Merchant Center Feed	Automated Node.js RSS 2.0 XML generator (generate_merchant_feed.cjs) for Google Shopping Ads and Free Product Listings.	5–8 hrs	\$175 – \$280	\$250 – \$400
6. CRO & Frictionless Checkout	1-Click WhatsApp Cash-on-Delivery checkout modal, Google Apps Script CRM Webhook synchronization to Google Sheets, dynamic free shipping bar, and contextual up-sells.	15–20 hrs	\$525 – \$700	\$750 – \$1,000
7. Analytics & Ad Attribution	Full tracking setup: GA4 (G-4P6XT6VMP7), Google Tag Manager dataLayer purchase events, and Meta Pixel (fbq('track', 'Purchase')).	4–6 hrs	\$140 – \$210	\$200 – \$300
8. QA, Testing & Deployment	Environment variable configuration (.env.local), Vercel/Netlify deployment setup, cross-browser/mobile QA testing, and domain/SSL linking.	8–12 hrs	\$280 – \$420	\$400 – \$600
9. Documentation & Team Handoff	Complete technical blueprint manual, developer onboarding guide, and operational maintenance scripts (backup_db.cjs , fix_images.cjs).	5–8 hrs	\$175 – \$280	\$250 – \$400
TOTAL PROJECT ESTIMATE	Complete Turnkey Platform Build	105–146 hrs	\$3,675 – \$5,110	\$5,250 – \$7,300

3. PROJECT PACKAGES & PRICING OPTIONS

To fit your business requirements and budget, we offer three commercial packages:

ESSENTIAL BUILD	PROFESSIONAL BUILD	ENTERPRISE BUNDLE
\$3,500 USD (35,000 MAD)	\$5,500 USD (55,000 MAD)	\$7,200 USD (72,000 MAD)
• Full Frontend & React 19 • Supabase DB & Fail-safe • WhatsApp COD Checkout • Google Sheets CRM Sync • 1 Month Bug Warranty	• Everything in Essential • Build-Time SSG Engine • Full JSON-LD SEO Suite • Google Merchant Feed • 3 Months Support	• Everything in Pro • 3 Geo Landing Pages • GA4 + GTM + Pixel Tracking • 1 Year Priority Support • Team Onboarding Session

4. VALUE PROPOSITION & COST SAVINGS

A. Zero Monthly Server Fees (Saves \$1,800+/year)

Traditional Shopify or Magento setups incur heavy monthly app fees (Shopify plan \$39/mo + SEO app \$20/mo + Search app \$30/mo + Reviews \$25/mo + WhatsApp app \$15/mo = **\$150+/month** or **\$1,800+/year**).

Our solution runs on **serverless infrastructure**:

- **Frontend Hosting (Vercel):** \$0 / month (Free tier due to SSG static rendering).
- **Database (Supabase):** \$0 / month (Free tier handles up to 500MB & 50,000 users).
- **CRM Synchronization (Google Sheets):** \$0 / month.
- **Total Monthly Infrastructure Expense: \$0 – \$20 / month** max.

B. Conversion Rate Advantage

- **0.6s Loading Time:** Every 1-second reduction in page load speed increases conversions by **27%**.
- **WhatsApp COD Flow:** Increases checkout completion by **35% to 50%** in North African and MENA e-commerce markets compared to mandatory credit card checkouts.

5. PROJECT TIMELINE & MILESTONES

The project will be completed within **4 to 6 weeks** following initial kickoff:

Week 1: Architecture, Supabase Database Setup & Design Tokens
Week 2: Core Frontend Component Development & Product Catalog Integration
Week 3: SSG Pre-rendering Engine, Sitemap & Google Merchant Feed Scripts
Week 4: WhatsApp COD Checkout, CRM Webhooks & Pixel Tracking Integration
Week 5: QA Testing, Cross-Device Polish & Vercel Deployment
Week 6: Team Training, Technical Handoff & Final Sign-off

6. PAYMENT TERMS & SCHEDULE

- **40% Initial Deposit:** Required upon project kickoff and agreement signature.
- **40% Midpoint Milestone:** Paid upon completion of core catalog, database, and checkout flow on staging environment.
- **20% Final Handoff:** Paid upon final production deployment, domain connection, and documentation delivery.
